AJEEM.S

B.Tech Artificial Intelligence & Data Science | AI/ML Developer

GitHub: github.com/ajeem-suban | LinkedIn: linkedin.com/in/ajeem-suban

Portfolio: ajeem-suban.vercel.app

PROFESSIONAL SUMMARY

Aspiring AI and Machine Learning Developer with hands-on experience building intelligent applications using Python, NLP, Large Language Models, Retrieval-Augmented Generation (RAG), computer vision, and AI agent architectures. Experienced in developing local AI systems, semantic search pipelines, and practical AI-powered solutions. Passionate about building efficient, scalable, and useful AI products.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, AI Agents, Embeddings, RAG

Frameworks & Libraries: FastAPI, React, Sentence Transformers, InsightFace, ONNX, PyTorch

Databases & Tools: SQLite, ChromaDB, Git, GitHub, Ollama, VS Code

Core Areas: Semantic Search, Vector Databases, Prompt Engineering, Model Evaluation, API Development

MAIN PROJECTS

TAMIL-AI.ME | Tamil NLP, Python, Sentence Transformers, ChromaDB
Developing a Tamil-focused AI and NLP platform for language understanding and semantic search. Working with Tamil text data, embedding generation, and vector-based retrieval to improve language-specific information discovery.

ROGERS | Python, Generative AI, AI Assistant
Concept and development of an intelligent personal AI assistant designed to support natural-language interaction and AI-powered task assistance.

SECRAIN | Python, FastAPI, React, Ollama, Qwen3, SQLite, ChromaDB
Built an AI-powered research and knowledge assistant using local LLMs and Retrieval-Augmented Generation. Integrates document retrieval, vector search, and conversational responses for knowledge discovery.

VCH-AGENT | Python, AI Agents, LLMs
Exploring an AI agent-based system focused on intelligent decision-making, task automation, and structured AI workflows.

CULLINAN-AI | Python, InsightFace, ONNX, Computer Vision, LoRA
Developing a personal AI system combining face recognition and personalized image-generation workflows. Implemented face detection, 512-dimensional facial embeddings, similarity-based matching, and a local computer-vision pipeline.

SMALL PROJECTS

AIRES | AI Assistant, Web Application
Developed an AI assistant project with an accessible web-based demonstration. Live Demo

TITAN | Voice Assistant, Speech Interaction
Explored a voice-activated assistant concept designed for hands-free interaction and command-based assistance.

Eye-Care Tool | AI, Healthcare Application
Conceptualized an AI-assisted eye-care application to support digital eye-health awareness and user assistance.

News-Bot | Python, Automation, NLP
Explored an automated news assistant concept for collecting, organizing, and presenting news information.

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence & Data Science
Dhanalakshmi Srinivasan University, Perambalur

Expected Graduation: 2028

CERTIFICATIONS & TRAINING

- Generative AI — IBM SkillsBuild (use exact certificate title/status)
- Introduction to Agents — Mercor
- Data Science Internship — KaaShiv Infotech
- AICTE / Edunet Foundation Training (use exact program title)
- Additional completed technical certifications (add exact verified titles)

ADDITIONAL INFORMATION

- Open to internships, entry-level AI/ML, and software development roles
- Interested in Generative AI, LLM applications, AI agents, NLP, and intelligent systems
- GitHub: github.com/ajeem-suban
